

Hospital Parking

Delivering parking solutions
that work for you

We'll look after your parking as carefully as you look after your patients.

Take advantage of our experience and expertise to make your hospital car parking more user-friendly, safer and more sympathetic to the needs of patients and staff alike.

Proven experience

VINCI Park understands the ins and outs of parking. We've been designing, building and managing car parks globally for over 40 years. We manage car parks on behalf of numerous Hospital Trusts throughout England, Scotland and Wales, across multiple sites and encompassing more than 15,000 parking spaces.

Financial expertise

We've got the size, track record and expertise not only to make your parking more efficient, but to make it pay. That's because, as part of a worldwide group, VINCI Park has the financial strength and security to provide you with guaranteed revenue in return for a contract to manage your parking.

Accessibility is the key

Patient choice is increasing with 'Choose & Book' and easy parking is a vital ingredient to attract patients and ensure staff retention.

A total offer

We can take care of every aspect of your parking – from providing staff who are not only trained to deal sympathetically with patients and visitors, but also act as a visible security presence for customers' peace of mind. Our services include management of parking offices, permit and ticket-issuing equipment, signage, fraud-proof audit trails and innovative additional services – such as mobility scooters and courtesy buses.

Smoother operation

The benefits to your Trust are clear. Better access, increased efficiency, happier patients, visitors and staff – and reduced financial headaches. Leaving you free to get on with what you're best at.

Designing around your needs.

Providing individual tailored solutions.

04

Individual needs

As with patient care, every Hospital Trust has its own special requirements when it comes to managing and operating its parking. That's why we work with you to devise a tailored solution that works – for your finances and the needs of your hospital.

Fixed fee

Want to know how much your parking is going to generate for you each year? And would you like that money now? We can provide a full up-front payment in return for a fixed period licence. We can upgrade your parking facilities at no cost to your Trust and run them for you.

Revenue share

If you prefer to share in the increased revenue generated by our more efficient approach to hospital parking, we can arrange a partnership agreement. We upgrade, operate and manage your parking and you share in the profits.

Design, build, finance and operate

We can also offer PPP/PFI arrangements to design, build, finance and operate your parking over a contracted period of time. We have the in-house ability to handle the project, together with the financial strength to deliver.

Track record

VINCI Park has a proven track record of turning hospital car parks from a cash-draining problem into profitable, cost-effective spaces, that enhance the hospital experience for patients, visitors and staff alike.

Financial strength

The number one parking operator in the world, VINCI Park is also part of the world's largest specialist civil engineering group, with an annual turnover of more than €30 billion and operations in more than 80 countries.

Now you can concentrate on patient care and use our extensive expertise to manage your hospital parking.

Managing your car park.
Benefit from our experience.

Making your parking operation as efficient and customer-friendly as possible means getting two vital areas right – the people and the facilities.

With VINCI Park you get both.

People who understand the hospital environment

Every one of our employees undergoes an intensive training programme tailored to the very special hospital environment. Manned car parks and offices provide a reassuring visible presence that deters crime and makes users feel more secure. Overall our people deliver:

- **Maximum parking capacity** – by dedicating specific parking sections to, and balancing the needs of, different user groups.
- **Efficient traffic flow** – through signage, road marking and design.
- **Helpful and trained security support** – for your patients, staff and visitors.
- **Intelligent permit issuing, management and control** – for different user groups.

Effective parking facilities

It's not just about our people. To support them, we invest in the very latest systems, services and facilities:

- **Up-to-the-minute technology** – including pay machines, CCTV, smart card schemes, solar-powered terminals, bespoke permit management software, improved lighting and variable message sign systems.
- **Flexible space and traffic management** – ensuring good traffic flow and space utilisation.
- **Manned parking offices** – to deal with day-to-day parking issues, taking the burden away from the main hospital reception.
- **Maintenance** – of all car park equipment, surfaces and signage.
- **Other ways we can help** – compassionate parking schemes for long-term patients, flexible parking to cater for different staff shift patterns, free mobility scooters for patients and visitors.
- **Refurbishment** – of your existing parking to provide maximum efficiency and make it a more attractive facility.
