

State-of-the-art.
Prestige car parking
in the heart of
London's Mayfair.

Car Park Management

City Centre Car Park
Mayfair, London

- 304-space, multi-storey car park
- Designed, built, financed and operated by VINCI Park
- Open and staffed 24 hours a day, 365 days a year

“I can't think of a car park which is as safe, sophisticated, well-designed and well-run as the Mayfair Car Park. Which is what we have come to expect”

Greg Hardysmith, Mayfair Porsche.

Small size, big challenge. Prestige site

When we designed, financed and built the Mayfair Park Lane car park, we did so to the highest standards demanded by the users and residents of one of London's most prestigious areas.

Security first

The car park has regular patrols and a CCTV system on every floor, which also monitors pedestrian access. There are numerous help and intercom points, high lighting levels, clear signage, stringent cleaning schedules and a public address system – all designed to help make customers feel safe and secure.

Catering for all users

In addition to the casual user and regular 'season ticket' business user, we provide contract parking to local businesses as well as a number of long-term leases for private customers, situated on their own private floor.

Added value services

Other facilities include toilets, full disabled access and a range of free services – including umbrella and bicycle loan.

New developments

Recently introduced, 'ChipCoin' technology issues motorists with an intelligent coin instead of a paper ticket, reducing operating costs and restricting access to pedestrians who do not hold a valid chip coin.
